**Subject:** Update on a couple of things

Busy week. I wanted to update you on a couple of things.

1. **Exide.** Deldi and I, ORC and Superfund had a detailed briefing from DTSC on the off-site cleanup. It actually sounds like they have things well in hand and are doing more than we would do. Kathleen Salyer is back and will be looking over the data. We also sent John Schofield down to do a joint RCRA inspection along with DTSC. There is a problem in the monitoring of a containment building – and this is something that the State should have caught before. They are on it now. As you know, the facility does not have a permit and is subject to interim status requirements only. John believes the monitoring system is subject to a prior consent order from the State, which gives the state better leverage to deal with this problem. CID is investigating movement of material off-site – that news has now hit the newspapers. Several of us (internally) are meeting on Monday to discuss how we respond to the County (Angelo Belomo and Barry Groveman) who have asked us to get involved.

Hope you are having a good time in the desert. Let me know if you want any further info on any of this.

Kathleen H. Johnson
